Shoebox Photo Scans

Shoebox scans are designed for all of us that have boxes of treasured old photographs packed in a box and tucked away in a closet. Our Kodak high speed scanner will save those photos to a CD for permanent storage and ease of sharing with others.

Photos may range in size from wallet (2 ½ x 3 ½) up to 8x12. Photos that are mounted may or may not run through the scanner. Damaged photos are processed at your risk. A determination whether we can scan a mounted photo will be made before we actually do the scan.

Standard scans are 300 dpi for the original size of the photo and written to a CD. Orientation and order of photos is not guaranteed.

How to prepare your order for scanning

Photos may range in size from wallet (2 ½ x 3 ½) up to 8x12. Photos that are mounted may or may not run through the scanner. Damaged photos are processed at your risk. A determination whether we can scan a mounted photo will be made before we actually do the scan.

1. Remove all photographic prints from albums, sleeves and/or envelopes. (No negatives or slides) We can only accept loose photos. Photos in albums can not be processed with our high speed scanner.
2. Sort your photos by size and organize them heads up. We can scan photos from 2 ½ x 3 ½ wallet size up to an 8x12 enlargement. No copyrighted photos can be reproduced. Please read copyright information and limit of liability statements found on the order form. Please note, due to the nature of the high-speed scans, variances may occur between high-speed mass quantity scans and individual scans in regards to color and/or contrast.
3. Categorize your photos in size order with the smallest on the top and the largest on the bottom.
4. Make certain every photo is face up with the top facing up. Photos not orientated the same direction will be scanned in the direction received. We will make every effort to make sure the photos remain with heads up but we can not guarantee. If you want to insure your photos are all the same orientation you may order that option at an additional charge.
5. If you have photos with writing on the back you may wish to have the writing scanned with the photo. In this case, put all two sided photos batched together and mark them as two sided. We will scan both sides and the back will appear directly after the front.

6. Only individual photos can be scanned. If there is any tape, glue, or other materials that might impede the scanning we cannot process that photo. If the photos are too thick or for other reasons cannot be scanned we will separate those images and package them separately for you with a notation that those images were not scanned.

Limit of Liability

Submitting any film, print, slide, negative or digital media to the Photo Shoppe for processing, scanning, printing, photo restoration or other handling constitutes and AGREEMENT by you that any damage of loss by our company, subsidiary, or agents, will not entitle you to any recovery and no warrantee is entered into. The acceptance by our company, subsidiary and/or agents of the film, print, slide, negative, scanning or digital media and original photos for restoration is without other warranty or liability, and recovery by anyone for any incidental or consequential damages is excluded irrespective of whether toe damage occurs because of our negligence, breach of contract, strict liability or other cause.
